

## 1 Product and Company Identification

<b>Product identifier</b>	Quartz Cuvette Cleaner		
<b>Synonym</b>	P19311, Cuvette Cleaner		
<b>CAS #</b>	Mixture		
<b>Product use</b>	For use with Trojan P254 UV Photometer		
<b>Recommended restrictions</b>	None known		
<b>Manufacturer information</b>	Trojan Technologies 3020 Gore Road London, ON N5V 4T7 CA Phone: 519-457-3400 Phone: 888-220-6118	<b>Australian supplier</b>	Alastair MacNab Trojan Technologies Group ULC 96 Ricketts Road MOUNT WAVERLY VIC 3149
<b>CANUTEC</b>	Phone: 613-996-6666	<b>Australian emergency #</b>	Phone: 011 03 97283953 Mobile: 011 0488 080069

## 2 Hazards Identification

### Classification of the chemical

This material is classified as hazardous under U.S. OSHA regulations (29CFR 1910.1200) (Hazcom 2012) and Canadian WHMIS regulations (Hazardous Products Regulations) (WHMIS 2015).

**Health hazards**

- Corrosive to Metals.
- Skin Corrosion/Irritation.
- Serious eye damage/eye irritation.
- Specific Target Organ Toxicity, Single Exposure.

### WHMIS 2015 defined hazard

#### Hazard symbol

**Signal word** DANGER!

**Hazard statement**

- May be corrosive to metals.
- Causes severe skin burns and eye damage.
- May cause respiratory irritation.

### Precautionary statement

**Prevention**

- Do not breathe mist or vapor.
- Wash thoroughly after handling.
- Wear protective gloves/clothing and eye/face protection.
- Keep away from combustible material.

**Response**

- If swallowed: Rinse mouth. DO NOT induce vomiting.
- IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
- IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- IF INHALED: Remove person to fresh air and keep comfortable for breathing.
- Immediately call a POISON CENTRE or doctor/physician.
- Absorb spillage to prevent material damage.

**Storage**

- Keep in a cool place.
- Store in original, vented, closed containers.

**Disposal**

Dispose of contents/container in accordance with local/regional/national/international regulations.

**Other hazards**

Other hazards which do not result in classification: Ingestion can cause irritation and corrosive action in the mouth, stomach and digestive tract. Toxic fumes, gases or vapors may evolve on burning. May intensify fire; Nitric acid is an oxidizer.

### 3 Composition/Information on Ingredients

Components	CAS#	Percent
Nitric Acid	7697-37-2	6-13

### 4 First Aid Measures

<b>Inhalation</b>	If symptoms develop move victim to fresh air. If symptoms persist, obtain medical attention. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen by qualified medical personnel only. Seek immediate medical attention/advice.
<b>Skin Contact</b>	In case of contact, immediately flush skin with plenty of water for at least 30 minutes. Get medical attention. Remove contaminated clothing and launder before use.
<b>Eye Contact</b>	In case of contact or suspected contact, immediately flush eyes with plenty of water for at least 20 to 30 minutes and get medical attention immediately after flushing.
<b>Ingestion</b>	Guard against aspiration into lungs by having the individual turn on to their left side. Rinse mouth with water. Seek immediate medical attention. Do not induce vomiting. Never give anything by mouth if victim is rapidly losing consciousness, unconscious or convulsing.
<b>General Information</b>	If feeling unwell, seek medical advice (show the label and SDS where possible). Ensure medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Avoid contact with eyes and skin. Keep out of reach of children.

### 5 Fire Fighting Measures

<b>Suitable extinguishing media</b>	Fires should be flooded with large amounts of water. Avoid using other types of extinguishing materials, such as foam or dry chemicals.
<b>Unsuitable extinguishing media</b>	Avoid using Carbon dioxide or other similar extinguishing agents as they are not effective in fires involving oxidizers.
<b>Specific hazards arising from the chemical</b>	Substance releases oxygen when heated, which may increase the severity of an existing fire. Burning produces obnoxious and toxic fumes. Contact with most metals will generate flammable hydrogen gas. Contact with water will generate considerable heat.
<b>Special protective equipment and precautions for firefighters</b>	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.
<b>Indication of immediate medical attention required</b>	Treat patient symptomatically.
<b>Specific methods</b>	Fight fires from a safe distance. Evacuate personnel to safe areas. Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. A full-body chemical resistant suit should be worn. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame.
<b>General fire hazards</b>	No unusual fire or explosion hazards noted.
<b>Hazardous combustion Products</b>	Oxygen; Nitrogen oxides.

# SAFETY DATA SHEET

## 6 Accidental Release Measures

<b>Personal precautions, protective equipment and emergency procedures</b>	All persons dealing with clean-up should wear the appropriate protective equipment including self-contained breathing apparatus. Keep all other personnel upwind and away from the spill/release. Restrict access to area until completion of clean-up. Refer to protective measures listed in <a href="#">Section 7</a> and <a href="#">Section 8</a> .
<b>Methods and materials for containment and cleanup</b>	Neutralize with lime slurry, limestone, or soda ash. Isolate spill and stop leak where safe. Flush area with water to remove trace residue. Contain spill with sand or other inert materials. Pick up solids and put in an appropriate sealed container for later disposal. Isolate hazard area and restrict access.

## 7 Handling and Storage

<b>Precautions for safe handling</b>	Avoid breathing vapor. Avoid contact with eyes, skin and clothing. Use with adequate ventilation.
<b>Conditions for safe storage, including any incompatibilities</b>	Tanks must be diked. Store in a cool, dry, well ventilated area. Place away from incompatible materials. Will corrode incompatible metals and many plastic materials. 304 or 316 stainless steel are acceptable materials of construction. Tanks should be vented and painted white or in light, heat-reflecting colors. Ensure that all pumps, valves, meters are of compatible material.

## 8 Exposure Controls/Personal Protection

<b>Occupational exposure limits</b>	No exposure limits noted for ingredient(s).
<b>Biological limit values</b>	No biological exposure limits noted for the ingredient(s).
<b>Appropriate engineering controls</b>	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.
<b>Individual protection measures, such as personal protective equipment:</b>	
<b>Eye/face protection</b>	Wear eye/face protection. Chemical splash goggles are recommended. A full face shield may also be necessary.
<b>Skin protection:</b>	Wash hands IMMEDIATELY if mercury leakage occurs.
<b>Hand protection</b>	Impervious gloves. Confirm with reputable supplier first.
<b>Other</b>	Where contact is likely, wear chemical-resistant gloves, a chemical suit, rubber boots, and chemical safety goggles plus a face shield.
	Ensure that eyewash stations and safety showers are proximal to the work-station location.
<b>Respiratory protection</b>	If airborne concentrations exceed the Occupational Exposure Limit, use a NIOSH/MSHA approved full face-piece respirator with acid gas cartridges. Do not use organic vapor and acid gas combination cartridges as these contain charcoal, which is incompatible with oxidizing acids.
<b>Thermal hazards</b>	Not applicable
<b>General hygiene considerations</b>	Handle in accordance with good industrial hygiene and safety practice.

## 9 Physical and Chemical Properties

<b>Appearance</b>	Clear to Brownish/Yellow
<b>Physical state</b>	Liquid
<b>Odor</b>	Slightly Pungent, Antiseptic like
<b>Odor Threshold</b>	Not available
<b>pH</b>	Not available
<b>Melting Point / Freezing point</b>	Not available
<b>Initial Boiling point</b>	Not applicable
<b>Pour point</b>	Not available

# SAFETY DATA SHEET

<b>Specific gravity</b>	1.096
<b>Partition coefficient (n-octanol/water)</b>	Not available
<b>Flash Point</b>	Not available
<b>Evaporation Rate</b>	Not available
<b>Flammability(solid, gas)</b>	Not applicable
<b>Upper/Lower Explosive Limits</b>	Not available
<b>Vapor Pressure</b>	Not available
<b>Vapor Density</b>	Not available
<b>Relative Density</b>	Not available
<b>Solubility(ies)</b>	Not available
<b>Auto-ignition Temperature</b>	Not available
<b>Decomposition Temperature</b>	Not available
<b>Viscosity</b>	Viscous
<b>Other information:</b>	
<b>Explosive properties</b>	May be reactive and decompose violently.
<b>Oxidizing properties</b>	Oxidizer; Will accelerate combustion and increase the risk of fire and explosion in combustible or flammable materials.

## 10 Stability and Reactivity

<b>Reactivity</b>	Corrosive to mild metals such as copper, aluminum, brass, iron, and mild steel. Not corrosive to 304L or 316 stainless steel. Will release flammable and potentially explosive hydrogen gas on contact with amphoteric metals.
<b>Possibility of hazardous reactions</b>	No dangerous reaction known under conditions of normal use.
<b>Chemical stability</b>	Material is stable under normal conditions.
<b>Conditions to avoid</b>	Do not mix with other chemicals.
<b>Incompatible materials</b>	Alkalies. Reducing agents. Combustible materials. Metals. Organic materials. Acids. Moisture.
<b>Hazardous decomposition products</b>	May include and are not limited to: Oxides of carbon.

## 11 Toxicological Information

<b>Routes of exposure</b>	Eye, Skin contact, Inhalation, Ingestion.
<b>Information on likely routes of exposure:</b>	
<b>Ingestion</b>	Corrosive! May cause severe pain in the mouth, chest and abdomen, leading to cough, vomiting and collapse. Ingestion may cause gastritis possibly progressing to necrosis or hemorrhage.
<b>Inhalation</b>	Causes severe respiratory irritation. Material is irritating to mucous membrane and upper respiratory tract. Exposure can cause coughing, chest pains and difficulty in breathing. Vapors may cause pulmonary edema.
<b>Skin contact</b>	Corrosive. Concentrated nitric acid chars the tissue with a characteristic yellow coloration. Causes severe burns. Severe and fatal skin burns can occur with necrosis and scarring.  No adverse effects due to skin contact are expected.
<b>Eye contact</b>	Corrosive to eye tissue and may cause severe damage or blindness.
<b>Information on toxicological effects:</b>	
<b>Acute toxicity</b>	Not available
<b>Skin corrosion/irritation</b>	Prolonged skin contact may cause temporary irritation.
<b>Exposure minutes</b>	Not available

# SAFETY DATA SHEET

<b>Erythema value</b>	Not available
<b>Oedema value</b>	Not available
<b>Serious eye damage/eye irritation</b>	Direct contact with eyes may cause temporary irritation.
<b>Corneal opacity value</b>	Not available
<b>Iris lesion value</b>	Not available
<b>Conjunctival reddening value</b>	Not available
<b>Recover days</b>	Not available
<b>Respiratory or skin sensitization:</b>	
<b>Respiratory sensitization</b>	Not a respiratory sensitizer.
<b>Skin sensitization</b>	This product is not expected to cause skin sensitization.
<b>Mutagenicity</b>	No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.
<b>Carcinogenicity</b>	No components are listed as carcinogens by ACGIH, IARC, OSHA or NTP.
<b>Reproductive toxicity</b>	This product is not expected to cause reproductive or developmental effects.
<b>Teratogenicity</b>	Not available
<b>Specific target organ toxicity (single exposure)</b>	Not classified
<b>Specific target organ toxicity (repeated exposure)</b>	Not classified
<b>Aspiration hazard</b>	Not an aspiration hazard.

---

## 12 Ecological Information

<b>Ecotoxicity</b>	Product may cause harm in the environment due to its low pH. Do not allow material to contaminate ground water system.
<b>Persistence and degradability</b>	Not available
<b>Bioaccumulative potential</b>	
<b>Mobility in soil</b>	Not available
<b>Mobility in general</b>	Not available
<b>Other adverse effects</b>	Not available
<b>Aquatic toxicity</b>	Toxic to aquatic life.

---

## 13 Disposal Information

<b>Disposal instructions</b>	Waste must be disposed of in accordance with federal, state/provincial and local environmental control regulations. This material and its container must be disposed of as hazardous waste.
<b>Local disposal regulations</b>	Dispose in accordance with all applicable regulations.
<b>Hazardous waste code</b>	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
<b>Waste from residues/unused products</b>	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
<b>Contaminated packaging</b>	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.
